

## TANGLE WIRE BARBLESS CONCERTINA COILS

Tangle Wire Barbless Concertina Coils are specifically designed as a deterrence against intrusion while eliminating any danger associated with sharpness of razor wire. With its quick and easy deployment, the Barbless Concertina Coils instantly create a safe and effective protective barrier.

### FEATURES AND BENEFITS

- **Rigid-Reinforced Design** – Durable concertina coil construction available in galvanized or stainless steel.
- **Effective Delay Barrier** – Creates a visible physical obstacle that discourages unauthorized access and intrusion.
- **Intruder Entanglement** – Designed to impede and slow individuals attempting to breach the perimeter.
- **Safe, Smooth Profile** – Non-cutting design minimizes risk of injury during deployment, contact, and retrieval.
- **Tool-Free Deployment** – Can be safely installed and recovered without specialized personal protective equipment.
- **Lightweight & Portable** – Weighs only 35 lbs. and collapses to a compact 4'2" × 10" for easy transport and storage.
- **Rapid Perimeter Expansion** – Extends to 33 feet and can be linked with additional coils to create virtually unlimited barrier lengths.
- **Ideal for Temporary Security** – Provides an immediate perimeter solution for low- to moderate-security environments.

### COMMON APPLICATIONS

- Asset and infrastructure protection
- Public events and festivals
- Crowd control and pedestrian management
- Retail and commercial properties
- Emergency response operations
- Temporary restricted-access zones
- Facilities requiring rapid perimeter establishment
