

# FAST ATTACK VEST IN ADVANCED WEBLESS SYSTEM WITH FIRSTSPEAR® TUBES™

PROTECH® Tactical's Fast Attack Vest is a versatile tactical platform for high-risk operations and offers a comprehensive panel array for the urban operator. Outfitted in Advanced Webless System load-bearing material, the Fast Attack in AWS features an approximate 30% weight reduction compared to traditional modular webbing, while increasing material strength and durability. The Tubes™ closure system, a product of the partnership with FirstSpear LLC, offers operators a quick and quiet method to don and doff the platform – a requirement in high-speed or high-stress situations.
